-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Claims 1 and 7 are generic to a plurality of disclosed patentably distinct species comprising Fig. 1, and Fig. 2, and Fig. 2, and Fig. 4. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. As a matter of courtesy to the Applicant, the Examiner is making the following observation with regard to the claims. The claims claim further cooling of a turbine rotor below the design point, in order to maintain the blade tip clearance under certain conditions. If cooling is to be effective in maintaining the blade tip clearance, and cooling was known in the prior art, wouldn't it be obvious to one of ordinary skill in the art to set the cooling to an effective temperature, be it lower than the "design temperature" as it may be. In order to expedite the prosecution of the present application, Applicant may want to revisit the claims in light of this comment and possibly amend them, or in his response Applicant may want to clarify why the claimed

cooling would not have been obvious to one of ordinary skill in the art at the time of the claimed invention.

3. As a further courtesy, the Examiner brings to Applicant's attention the following references: Giffin 6672072 and Burrus 5619855. Both references teach cooling of the turbine cooling air.

4. A telephone call was made to Erik Swanson on 1/12/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ehud Gartenberg whose telephone number is 571 272 4828. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl Tyler, can be reached on 571 272 4834. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
